To Whom It May Concern

Dear Sir/Madame,

On behalf of the National Astronomical Research Institute of Thailand (Public Organization) – NARIT, it is my pleasure to express to you – my contribution – for the "Using astronomy surveys to train Thai researchers in handling Big Data" which emerged out of the collaborative partnership between NARIT and STFC – Science and Technology Facilities Council of the United Kingdom, under the Newton UK-Thailand Research and Innovation Partnership Fund.

It has always been one of our priorities here at NARIT to serve the public and thrive as a leading regional research institute in astronomy and related fields, in order to strengthen all aspects of development, which corresponds to the objectives of Newton Fund. We consider a great deal of opportunity to collaborate with our delivery partner – STFC on this occasion.

I am pleased to continue a relationship that is beneficial to both of our institutes and beyond, and look forward to your positive response in the time to come.

With best regards,

Saran Poshyachinda, Ph. D.
Executive Director of NARIT
